## Methodology:

- [Census data](#) was used to identify the adult (18+) population in each county and the overall adult population of the Republic of Ireland.
- [Healthy Ireland \(HI\) Survey 2025](#) was used to determine the number of vapers in each region. HI estimates that 8% of the adult population or 352,000 people in Ireland are vapers. HI also estimates that 50% of vapers are former smokers. This equates to 176,000 people.
- [Red C](#) polling revealed that 1 in 3 (33.3%) of these former smokers, or 58,080 people will relapse into smoking if flavours are restricted to tobacco.
